

SAM

SECTOR SKILLS STRATEGY
IN ADDITIVE MANUFACTURING

Why is AM training important?

- 1 New jobs around AM will be created and finding the workforce with the right competences is a challenge.
- 2 Industries currently face obstacles to identify the necessary people such as technicians, engineers, designers and operators specialized in AM.
- 3 AM professionals are expected to be creative and to also have technical and engineering skills.
- 4 Technical and engineering skills required vary widely and there is a need for a more consistent and uniform approach towards training.
- 5 AM training will upskill, preserve and develop the employability of EU workers.
- 6 Specific training and educational activities can target key sectors, including automotive, aerospace and consumer industries
- 7 An integrated and interdisciplinary approach will prepare the current and future workforce to boost AM's real potential.
